Final conclusion: Good Evidence of compliance with the BAFE Scheme Observed on this one day Site and office based assessment. It was observed on this and previous audits GTM Electrical Ltd have continued to provide a good service to their clients. The management system used by GTM (datascribe) for reporting and calculating performance is good. There was excellent levels of technical expertise displayed by both Mark and Lee during the Maintenance assessments, especially on the site visit and excellent preparation made prior to the audit following the audit plan and having information prepared in a folder. Changes made and documentation included for ver 8.0.1 requirements, No NCRs identified on this visit. I recommend continuing certification for the Maintenance only scope. Overall, a very good audit result. Many thanks to Sam, Lee and Mark for their assistance on the day.
